Research projects

The College organized a circle research work.

Every year students majoring in "pharmacy" take part in an internal scientific and practical conference for the best scientific research.

Research work: 1. A. Askarova " Nursing process»

2. A. O. Omarova "Bedsore", 3. R. K. Nadirbaeva "hospice Care". 4. E. S. Galiaskarov "Reanimation charlar". 5. M. N. Zamanbekova "Features of care for elderly patients".

Circles.1. Optik -25 students, coulometer S. Erkasov,

2. "Orta Asia" -37 students, head G. A. Kasenova

3. "Til go zherdya ult go" -24 students, head G. K. Belgibaeva

4. "Dentist" -10 students head B. O. Esenbaev.

5. "I'm a laboratory assistant" -8 students head A. Zh. Zholdasova

(IV)A DESCRIPTION OF THE VISIT OF THE WEC

The work of the EEC was carried out on the basis of the visit Program of the expert Commission on institutional and specialized accreditation of educational programs in the medical College "Avimed" LLP in the period from April 03 to April 05, 2018.

To obtain objective information about the quality of educational programs and the entire infrastructure of the College, to clarify the content of self-assessment reports, meetings were held with the I/o Director, and/about the Deputy Director of educational work, Deputy Director of educational work, Deputy Director of HR, head of human resources, head. CMK,, methodologist, chief accountant, teachers, students, graduates, employers .

A total of 285 people took part in the meetings.

Category of participants	amount
Director	1
Deputy. Directors	4
Head of division	7
Chief accountant	1
Personnel manager	1
Teachers	68
Students	165
Graduates	21
Employers, social partners	17
Just	285

In the process, the WEC conducted a visual inspection of the infrastructure of the College: classrooms, computer labs, library, reading room, gym, infirmary, power point, educational-clinical centre, clinics of preclinical practices. The documentation of cyclic methodical commissions, departments implementing accredited educational programs is also studied. Visited the base for the practical training of accredited programs: Municipal public institution "Center of special social services delivery No. 3", state-owned utility enterprise "City hospital №5", scee on PVC Regional hospital №1, SCE on PVC "Station of fast urgent medical aid №3", SCE on PVC "City hospital №1", Republican children's rehabilitation centre "Balbulak", on PVC GKB №7, pharmacy LLP "Evrofarm".

For conducting industrial training and professional practice, the College signed contracts with the heads of 20 medical organizations in Almaty. A close connection with the basic MO is established. Social partnership in the field of medical education is aimed at bringing the level of training to the needs of employers, strengthening the College's ties with the Ministry of defense. In order to strengthen and develop social partnership with medical organizations and the College, some joint work is carried out in the following areas: forecasting the training of qualified specialists, patient-centered approach to training, improving the relationship between the educational institution and the Ministry of education. In the current practice, such forms of cooperation as practical training of students in real jobs, the participation of employers in the certification of students, joint activities, meetings with students and parents, organization of excursions to the College, acquaintance with the profession are often used.

In the base defense established the necessary conditions for quality practice, 18 dedicated classrooms for students of College: Municipal public institution "Center of special social services delivery No. 3", state-owned utility enterprise "City hospital №5", scee on PVC Regional hospital №1, SCE on PVC "Station of fast urgent medical aid №3", SCE on PVC "City hospital №1", Republican children's rehabilitation centre "Balbulak", on PVC GKB №7, pharmacy LLP "Evrofarm".

Members of the WEC visit was undertaken of the clinical sites. When visiting the practical bases, the experts got acquainted with the material and technical base of medical organizations,

visited the administrative building, specialized departments, where students undergo industrial training and professional practice. A meeting was held with the chief doctor Professor G. W. by Bodycover, Deputy chief physician at the nursing state-owned utility enterprise "City hospital №5" - T. A. Ahmetgalievoy, SCE on PVC "municipal clinical hospital No. 1" Professor, head. Department of thoracic surgery E. S. by Kaliaskarova, Municipal public institution "centre for the provision of social services number 3" Deputy Director on medical issues R. T. Kulibaev, SCE on PVC "Station of fast urgent medical aid №3" PhD head.substation A. I. Aminof, Republican children's rehabilitation centre "Balbulak" Deputy Director for clinical work of E. W. Utemisova, pharmacy LLP "Evrofarm" pharmacist of Kaldybaeva, and senior nurses, head.departments that spoke about the requirements for the trainees, the process of practical training. During the conversation with the heads of medical organizations revealed that the clinical facilities are working in close contact with the medical College. Medical staff of clinical bases conduct practical training directly in the workplace, make their suggestions and recommendations for improving the OP, actively participate in the development and implementation of OP, participate in the assessment of the quality of knowledge and skills of students and College graduates. It is revealed that 18 classrooms for practical training have been created in the above clinical bases. All training rooms are equipped with the necessary equipment: visual AIDS, teaching materials for improvement and consolidation of practical skills.etc. by the head of College and head of MO appointed General supervisors (mentors).

At the time of visiting the MO, the production training were students of the 3rd and 4th year of the College

Also graduates of medical College "Avimed" (8 persons) were presented, with them interviewing was carried out . They shared with the members of the EEC about the success in their work, about their achievements, expressed gratitude for the deep knowledge gained in the College.

The feedback of the MO leaders about the students and graduates of the College is positive.

From the words of the leaders visited clinical sites found that 21 graduates of this College are successfully employed in these MO.

Members of the WEC were visited theoretical and practical classes on disciplines "Internal medicine", "Surgical disease", "Childhood diseases", "Obstetrics and gynecology" "Informatics", "Pharmacology", "Algorithm Tseng, randalu. The algorithm acjetter" "Antibiotika" and educational event "Alysum Sagan Mangilik YEL!"

On the basis of COSSU "veterans House №3" members of the EEC participated in the conference lesson on "Bedsore". The analysis of the visited classes showed that teachers have developed calendar-thematic plans, approved work programs, UMK. In General, all the classes were held at a sufficient methodological level.

(V) A DESCRIPTION OF THE PREVIOUS ACCREDITATION PROCEDURE

Previously, there was no accreditation at this institution.

(VI) THE STANDARDS OF SPECIALIZED ACCREDITATION

6.1. Standard " Mission and leadership»

Evidence part

The vision, mission and strategy of the College are coordinated among themselves, adequate to the available resources, needs of the labor market and educational policy of the Republic of Kazakhstan.

The College's vision: the Desire to strengthen its position in the market by improving educational services in demand in the labor market, meeting the needs of practical health care, strengthening the internal environment of the College, the formation of key competencies of the future specialist through the content and technology of the educational process.

Mission of the College: "Quality training of active and competitive secondary health workers for medical organizations of the Republic of Kazakhstan, improvement of educational and educational process, research and innovation".

1. **Strategic goal:** to ensure that students receive a profession and appropriate qualifications;

2. Development of the concept of training and education of specialists in the framework of modern practice-oriented approach to training;

3. Education of a highly qualified specialist with an active life position;

4. Development of the system of assistance to employment of graduates;

5. Development of material, technical and methodological base of the College;

6. To comprehensively develop health-saving educational space in order to preserve and strengthen the health of all subjects of the educational process of the College;

The basis of the mission, goals and objectives for the development of the College laid the provisions of the State program of education development for 2011-2020, the Strategic development plan of Kazakhstan until 2020, a Comprehensive plan for the development of nursing in Kazakhstan until 2020, the Message of the President of Kazakhstan - the Leader of the nation N. Ah. Nazarbayev to the people of Kazakhstan "Strategy" Kazakhstan-2050 new policy of the established state".

The vision and mission of the College are adjusted to take into account the new program documents and annual Messages of the President of the Republic of Kazakhstan. **Ah. Nazarbayev to the people of Kazakhstan.**

The College development strategy is focused on sustainable development and competitiveness of educational services. The mission, goals and objectives of the College within the development Strategy were discussed and approved at the meeting of the pedagogical Council (Protocol No. 1 of August 31, 2017).

The College has given sufficient attention to the development of mechanisms to support the mission, goals and objectives. The basic documents for the implementation of the goals and objectives of the College: the strategic development plan of the College, the work plans of the pedagogical Council, methodical Council, the educational work, the work plan of the SSC. All of them are approved annually at the first meeting of the Pedagogical Council in August.

The organization systematically collects, collects and analyzes information about its activities and conducts self-assessment in all areas, based on the development and implementation of measurement, analysis to assess the success of the implementation of its own strategy through indicators such as "performance" and "efficiency". On the basis of the development Strategy, the College administration annually develops and approves the main objectives and specific indicators to be achieved at the end of the school year. The analysis of the College activities in accordance with the criteria of institutional accreditation showed that the College has a well-defined and clear mission, implemented in accordance with the established priorities of the Ministry of Health of Kazakhstan, clearly defining the purpose of the College and its development strategy. The mission, goals and objectives are carried out within the framework of the main development priorities, to which appropriate financial, human and methodological resources are allocated to ensure the implementation in the changing external socio-economic environment; the contribution of the College in educational

development is noted, taking into account the policy in the field of education and health.

In the field of management of various processes of the College (educational, methodical, educational), administrative documents are also used: decisions of collegial bodies (pedagogical Council, methodical Council, meeting with the Director, the Council of group curators, the Council for the prevention of offenses, the headman), orders and orders of the Director in the areas of activity, documents on the personnel of employees and students, planning, reporting, financial and accounting documents.

The mission, vision and strategy statements of the College fully reflect the individuality and uniqueness of the College.

At the same time, the survey of teachers, which was attended by 37 people (46.2% of the total number of PS), showed a fairly high level of assessment of the College's compliance with the criteria of this Standard.

So, for example, the reflection of the mission of the College in educational programs, in their opinion, is at a good level (97.3%); involvement of teachers in the process of making management and strategic decisions 96.8% of respondents.

Analytical part

Analysis of the College's compliance with the criteria of this Standard generally indicates the maturity of the administrative and managerial staff (hereinafter-the AUP) in understanding the importance of clear strategic, tactical and operational planning in achieving the goals and objectives, the presence in the organization of a comprehensive development system and continuous improvement.

The main advantage of the College is a systematic work on the involvement in the planning and evaluation of groups of representatives of all stakeholders, including students and employers.

Strengths/best practice:

- Vision, mission and strategy of the College are coordinated among themselves;
- The stated mission and strategic goals correspond to the goals and objectives of the national system of technical and professional, after secondary education, development of the region;
- All dynamics of activity of OP in all directions is carried out according to mission, strategy, available resources of College which provide achievement of final results of training.
- Timely review of the mission, purpose and policies of the College.

Conclusions of the EEC on the criteria: (strong/ satisfactory/ suggest improvements/ unsatisfactory)

In General, according to this Standard, the activities of the organization meet the criteria. But at the same time, the medical College needs to increase the number of full-time teachers of special disciplines. Ensure transparency of evaluation criteria.

Quantitative indicators reflecting the compliance of the organization with the standard criteria are as follows::

Strong positions – 5, satisfactory-1,
suggest improvements-0, unsatisfactory-0

6.2. Standard " Educational programs»

Evidence part

Training of specialists on OP "pharmacy" is carried out according to the SES 2010. 2016.

Documentation on educational programs, developed by the College, includes RUP, schedule of educational process, schedule of classes, working curricula of disciplines, calendar-thematic plan, programs of professional practices.

The content of educational programs in the College is built in accordance with the Standard curriculum of specialties. When developing RUP specialties College changed to 30%

of the amount of training time for the cycles of disciplines (allowed by the requirements of SES norm) while maintaining the total amount of training time allocated for the development of professional training program.

Working curricula for all specialties are considered at the meetings of the methodical Council and approved by the Director of the College.

The conclusions that the OP correspond to the mission of the College and the needs of students, the College makes on the basis of feedback from employers, where College graduates work.

The College pays special attention to professional training: lectures, practical classes in General and special disciplines, industrial training, professional practice.

Types of practice of College students are: educational practice, industrial training and professional practice. For the best organization and conduct of professional practice between the College and medical organizations of the city signed 9 long-term cooperation agreements.

The understanding of the leadership OP the importance of effective cooperation with the social partners in the content of education is demonstrated by the facts of involvement of partners and the formation of programmes and curricula to meet modern requirements to the specialists.

Employment monitoring is carried out systematically. Annual growth in employment 2014/2015 – 71%, 2015/2016 – 52%; 2016/2017 -81%, that proves the demand in the graduates of the medical College, this contributes to the close relationship with the employers of the city and region.

The survey of the teaching staff conducted during the visit of the VEK NAAR showed that:

- content of OP satisfies: very good -62, 2% of respondents, good-37.8%;
- 100% of respondents are satisfied with the attention of the College management to the content of OP
- 91.5% of respondents are satisfied with the formation of the ability to analyze the situation and make forecasts for students of OP.

Analytical part

It is important that the leadership of the OP understand not only the participation of social partners in the development of training programs, but also the involvement of partners in the organization and preparation of standards of practical skills of the OP, taking into account the requirements for practical health professionals.

According to the results of the study and analysis of the evidence base to the criteria of the standard, the experts of the EEC noted:

- Educational programs and teaching methods are based on modern principles of learning, however, in practice, the use of innovative teaching methods that promote education of students responsible for their learning process is not enough.
- The operational link between the educational program and the subsequent stages of professional training (bachelor's degree, specialization) and practice, which the student will start after graduation, is not sufficiently represented.

Strengths/best practice

- Compliance of educational and program documentation: model curriculum, model work curricula and programs, individual curricula goals and content of the educational program to achieve the expected learning results;
- Medical College ensures that students acquire sufficient knowledge and professional skills to provide qualified medical services;
- The set goals of the OP and the final learning outcomes achieve a qualitative assessment of professional skills through effective cooperation between health and education organizations.
- The medical College provides various assessment methodologies that reflect established

core and professional competencies, and evaluate the achievement of learning outcomes;

The recommendations of the WEC

- To intensify work on the introduction of innovative teaching methods;
- To establish an operational link between the educational program and the subsequent stages of professional training of students (bachelor's, VSO, specialization) or practice at the end of their training.
To bring the DPD into line with current regulatory legal document.
- To introduce the discipline of demand for modern health care.
- To allocate the amount of time a component of specialisatie given the labour market.
- To ensure transparency of the evaluation criteria reflecting the established basic professional competence.
- To improve the relationship between the CB programme and the subsequent stages of training.

Conclusions of the EEC on the criteria: (strong/ satisfactory/ suggest improvements/ unsatisfactory)

In General, according to this Standard, the activities of the organization meet the criteria. Quantitative indicators reflecting the compliance of the organization with the standard criteria are as follows::

***Strong positions – 2, satisfactory-7
suggest improvements-0, unsatisfactory-0***

6.3 Standard "Efficiency of the educational program»

Evidence part:

**Dynamics of performance indicators and quality of knowledge on IGA:
Results of the final state certification of specialty "pharmacy" with qualification 0306013 "
Pharmacist»**

Academic year	Number of graduates	Of them passed the exams:				Academic performance %	Quality of knowledge %	Average score	Received a diploma with honors
		«5»	«4»	«3»	«2»				
2014-2015	110	3	107	-	-	100	100	3,8	2
2015-2016	52	4	47	1	-	100	98	4,0	2
2016-2017	70	4	59	7	-	100	90	3,9	2

As part of the educational program in the College is determined and implemented a plan of evaluation of students, which establishes the fact of achieving graduates expected learning outcomes and program effectiveness is evaluated. The management of the OP

provides equal opportunities for students, including regardless of the language of instruction for the formation of an individual educational program aimed at the formation of professional competence

Monitoring the quality of knowledge of students in groups, specialties and courses is held at the end of each semester, 2 times per academic year. Analysis of the results of the final state certification is carried out by the Chairman of the qualification Commission, appointed from among employers and representatives of practical health care. The results are heard at the pedagogical Council, corrective actions are planned.

The analysis of indicators of progress and quality of knowledge on the IGA shows the stability of the quality of training.

The material and technical equipment of the rooms of special disciplines meets the requirements of the "Approximate report card of equipment of rooms" and averages 85%.

For self-study students there are computer classes with access to the Internet. There is a library with a sufficient amount of educational literature. There are simulation rooms of nursing technology, for children's diseases, surgery, obstetrics and gynecology, and internal diseases. There is a training and clinical center for the development and consolidation of practical skills. The rooms are equipped with new training simulators, mannequins, phantoms, ergonomic equipment, medical furniture.

To ensure the availability of human resources for each group are assigned curators, for help as mentors - heads of departments, College psychologist, Deputy Director for educational work, for social and material assistance, students can contact the head of the Department. Additional classes are organized in each room, the schedules of which are placed on information stands on each floor. Information stands containing all the necessary information for students are decorated. To assess the effectiveness of the educational program conducted a survey of students, employers; open day; employer reviews of College graduates. The functioning of this system allows to increase the efficiency of the College educational activities. All graduates of the specialty "Medical business" have successfully passed the certification procedure.

The survey of students conducted during the visit of the VEK NAAR showed that:

- Overall quality of the training programs - "fully satisfied" - 97.3%, respondents-100% satisfaction;

- Methods of training in General - "fully satisfied" - 97.3%, respondents -100% satisfaction;

- Quality of teaching - "fully satisfied" - 98.7%, respondents -100% satisfaction;

The structuring of the content of the course is "fully satisfied" and 92% of respondents - 100% satisfaction;

- Efficiency of teaching methods used- "fully satisfied" -89.3%, respondents -100% satisfaction.

Analytical part

According to the results of the study and analysis of compliance of the evidence base criteria of the Standard to the experts of the WEC were given the documents confirming the criteria of the effectiveness of the educational program. They were introduced to the mechanisms of feedback from consumers of educational services: students, employers.

A detailed analysis of employers' satisfaction with the quality of training of graduates was presented.

The mechanisms of control over the quality of teachers' work, as well as the General order of complaints and appeals from students are presented.

Strength:

- The College has a sufficiently equipped material and technical base;
- Opportunity to practice practical skills in the training and clinical center
- A sufficient number of classrooms in clinical practice bases with modern equipment for training.

- Resources for the acquisition of practical skills and professional competencies of students are presented in full.

Recommendations:

Continue work on the introduction of research into the educational program.

Conclusions of the EEC on the criteria: (strong/ satisfactory/ suggest improvements/ unsatisfactory)

In General, according to this Standard, the activities of the organization meet the criteria.

Quantitative indicators reflecting the compliance of the organization with the standard *criteria are as follows:*

Strong positions – 5, satisfactory-2

suggest improvements-0, unsatisfactory-0

6.4. Standard " Teachers and teaching effectiveness»

Evidence part

The staff of the College is staffed in accordance with the requirements of SES RK.

Organizational and staff structure, the practice of selection and study, enrollment and placement of staff, the formation of a quality reserve of the College are aimed at creating the necessary conditions for effective activities to solve educational problems.

Qualification requirements to the teaching staff of the College are determined in accordance with the " Standard qualification characteristics of positions of teachers and persons equated to them", approved by the order of the Minister of education and science of the Republic of Kazakhstan dated 13.07.2009 № 338.

Selection and placement of personnel is carried out taking into account business and professional qualities. The distribution of teachers in the disciplines is carried out in accordance with their qualifications for the diploma.

The administration pays special attention to young teachers: the College operates a School of young teachers, organized mentoring, assistance in mastering the theoretical and practical materials in the content of the program and the organization of the educational process.

According to the legal documents, the annual workload of engineering and teaching staff is determined. The load includes the volume of the number of hours on the subject of teaching, consultations and exams, supervision, office management. The performance of the academic load is reflected in the educational journal, in the reports of the teacher on the done educational work.

At the beginning of the academic year, teachers make "Individual work plans", which are considered at meetings of cyclic methodical commissions. In the individual plan the teacher reflects the organizational moment, educational and methodical work, scientific and practical work, educational work, improvement of target qualifications (attending seminars, coaching, master classes, trainings, conferences, etc.), improving pedagogical skills.

According to the educational and methodical work of the teacher reflects the development of working training programs in accordance with the SES, calendar and thematic plans, preparation of methodological developments, UMK, exam materials for the current, intermediate and final control of knowledge, development of didactic material, preparation of material for pedagogical coaching on modern teaching methods. Educational work is reflected in accordance with the plans of CMK and the College as a whole. The implementation of individual work plans of teachers in all sections is controlled by the head of CMK. At the end of the academic year, teachers provide a report on the implementation of individual plans for the approved form and activities in accordance with the criteria for assessing the activities of the teacher head CMK.

The reports are discussed at meetings of the SSC. Failure to perform the planned work without a valid reason is also considered in accordance with the criteria. The head of the cyclic methodical Commission writes the conclusion in protocols.

At the medical College "Avimed" professional development be implemented in various forms without departing from labour activities (including distance learning), for individual educational programs, off-the-job performance of their official duties at the place of work or partial separation from employment. Over the past 5 years, College teachers have passed training courses through the Training and methodological center "Tabys", University "Turan", "Kanban" (Kenzhagarina L. S.), as well as at "Abia consult" LLP (courses of QMS), JSC "national center of excellence "Orleu", "KazNMU named after S. D. Asfendiyarov". In addition, the training of teachers is carried out by participating in seminars, conferences, competitions of city, national levels.

The following basic forms and methods are used to improve the skills of College teachers:

- passing of advanced training courses;
- active participation of teachers in the planned activities of the College, the city, region, the Republic of;
- peer-to-peer learning;
- research work;
- mentoring;
- participation in workshops, conferences, training exhibitions, pedagogical readings;
- participation in the work of the School of young teacher, school of pedagogical skill's.

The founders of the College annually allocated funds for training of staff.

Young teachers improve their professional level, studying in the master's degree, getting a second higher education.

The work of teachers is systematically evaluated in several areas: the quality of teaching discipline, the quality of teaching load, the availability of educational and methodical complexes on the taught discipline, compilation of collections (lectures, methodological developments), conducting demonstration training, the presence of published articles, participation in the social life of the College, district, city. The assessment is made by the chairmen of CMK, methodologist, heads of departments, Deputy Directors for educational, educational, practical work, respectively, activities. At the meeting, the results of the criteria are analyzed and brought to the attention of each teacher of CMK.

In accordance with the regulatory documentation is annually determined by the staff of the SS College. In the 2015-2016 academic year, 68 teachers were involved in the training of students, including 51 (70 %) full-time teachers and 17 (30%) part-time teachers.

Among the staff teachers 2 (4%) candidates and 2 (4%) masters of Sciences, have qualification categories: higher -7 (14%), the first – 3 (6%), the second – 18 (36%), have no category – 19 (38%).

In the 2016-2017 academic year, 70 teachers were involved in the training of students, including 49 (70%) full-time teachers and 21 (30%) part-time teachers.

From among the staff teachers 2(4%) candidates and 3(7%) masters of Sciences, have qualification categories: higher -2(4%), the first – 3(7%), the second – 18(37%), do not have category – 21 (43%).

In the 2017-2018 academic year, 92 teachers were involved in the training of students under the educational program "General Medicine", including 29 (85.3%) full-time teachers and 5 (14.7%) teachers of part-time teachers.

From among the staff teachers 1 candidate of Sciences, have qualification categories: the highest and the first category 8 people (27.6%), the second category – 14(48.3%), do not have a category – 5 (17.3%).

A survey of the teaching staff of the College, conducted during the visit of the VEK NAAR, showed that

- the content of the educational program meets the needs of the teaching staff at 100%
- the College provides an opportunity for continuous development of teachers ' potential by 97.3%
- innovation activity SS are encouraged 97.3%
- work to improve the skills of the PS set at 100%
- the level of stimulation and involvement of young professionals in the educational process is 97.3%.

Analytical part

According to the results of the study and analysis of the evidence base to the criteria of the standard, the experts of the EEC conclude that with a sufficiently flexible organizational structure and high human resources potential in the College:

-the mechanisms of introduction of information technologies and innovative teaching methods based on monitoring and evaluation of their use (study, synthesis and dissemination of positive pedagogical experience; development and replication of author's educational and methodical products, etc.) are not enough worked out.

- it is necessary to activate the activities of the College administration to improve the categorization of the teaching staff of the educational program;Сильные стороны/лучшая практика

- The teaching staff, ensuring the implementation of the OP, is represented by experts in the relevant fields of knowledge covered by the educational program;

- The number and quality of teachers meets the qualification requirements for organizations of the TVET ;

- The teacher takes part in the continuous development of pedagogical skills;

- Effective action " School of young teacher»;

- The College provides evaluation of teachers ' competence and monitoring of their activities

- The distribution of teachers in the disciplines is carried out in accordance with their qualifications for a diploma and / or experience in the workplace, all personnel procedures are transparent;

The recommendations of the WEC:

- To intensify activities to improve the categorization of the teaching staff of the OP;

- To improve the mechanisms of introduction of information technologies and innovative teaching methods;

- To improve the system of information and methodological support of teachers (exchange of experience with other educational organizations);

- To establish cooperation with Kazakhstan and international educational institutions.

- To ensure the compliance of the teaching staff with the qualification requirements and the specifics of educational programs.

- To attract specialists with experience in the field of the implemented discipline.

- Provide the number of staff teachers in special subjects.

Conclusions of the EEC on the criteria: (strong/ satisfactory/ suggest improvements/ unsatisfactory)

In General, according to this Standard, the activities of the organization meet the criteria.

Quantitative indicators reflecting the compliance of the organization with the standard criteria are as follows::

Strong positions – 3, satisfactory-7,

suggest improvements-1, unsatisfactory-0

6.5. Standard " Students»

Evidence part

The students at OP in "General medicine" is 360 people, of them in the official language of obuchaet 260 people.

Changes in policies, procedures and information about the educational programme are communicated to students in a clear, consistent and timely manner. The existing system of assessments in the College is based on the Standard rules of the current monitoring of progress, intermediate and final certification of students in organizations of technical and vocational, post-secondary education, approved by the Order of the Ministry of education №125ot 18.03. 2008.

Students are informed about the evaluation strategy used in their program, about exams or other methods and evaluation criteria, which will be used to assess their knowledge, skills and attitude of the provision on evaluation criteria for students in theoretical and practical classes. Students have the right to make proposals on the improvement of the educational process, to take part in solving important issues of the College, are members of the collegial bodies.

Information about the rules and procedures for admission is available on the College website, in booklets, brochures that were distributed during the "open Days". The applicant has the opportunity to get advice in the admissions office, which begins its activities on June 1. The College is actively carrying out career guidance work, as part of the "open Day", the Commission on career guidance in schools and medical. organizations of Almaty, Almaty region.

There are booklets and information materials for students. For students of the first course, talks on the adaptation of training in College and psychological and pedagogical support are held, guides in the state and Russian languages are developed, which are issued by group curators at the beginning of the school year. The guide presents: General information about the College, the administration, the mode of operation of all departments, the rules of the educational process, the system of monitoring and evaluation of students ' knowledge, the order of payment for training.

For the effective organization of the educational process in the College developed the basic documents regulating educational activities: the Charter of the College, the internal regulations, the schedule of the educational process, the schedule of training sessions, circles, sections and additional classes.

In relation to socially vulnerable categories of students, the College has a comprehensive social policy that allows to implement important social tasks.

The program of professional practice meets the state standards of technical and vocational education, fully meets the goals and objectives of training. Throughout the entire period of the internship, students receive Advisory assistance from the heads of practice, as well as by persons responsible for practical training in the field.

Assessment of satisfaction of representatives of employers of organizations and enterprises with the quality of training of College students is carried out by means of questionnaires.

In order to implement the State program of development technical and vocational education in the Republic of Kazakhstan and the order of the Ministry of education and science of the Republic of Kazakhstan "On approval of the list of professions of technical and vocational education in the framework of the gradual introduction of assessment of level of professional readiness and qualification assignment" in College, testing of students on independent assessment of level of professional readiness and qualification assignment (more, OUPP) on specialties through the portal of the Committee for control of medical and pharmaceutical activities, which amounted to in 2017 - 94%

Educational institution "Interdent" medical College LLP is a member of the Association of colleges of Almaty. According to the plan of the Association, The student Council of the College takes an active part in career guidance work, in city competitions, in city competitions, student reviews, competitions, round tables, discussions, at the annual forum of Student self-government

"Altyn Urpak". Students take part in the organization and holding of scientific and theoretical conference dedicated to the Day of the first President " 100 steps to the future-a step to the prosperity of Kazakhstan»; scientific and practical conferences: "550th anniversary of the Kazakh khanate", "30th anniversary of December events", "25th anniversary of independence of Kazakhstan", "70th anniversary of the Victory of the great Patriotic war" and many others.

The student Council holds city events and participates in them, including: charity events "25 good deeds" in providing assistance To the society of the Council of veterans of Almaty, the Department of pediatric Oncology Research center of Pediatrics and pediatric surgery, Children's home №2, the center of palliative care of Almaty (Hospice).

Students of the College participated in the city sports Contest dedicated to the 20th anniversary of the Assembly of peoples, and took 2nd place in the national igretogyzkumalak, 3rd place in table tennis.

Student of the 2nd course Beisenova and Nazerke, student of the 1st course of a month Cobain was awarded "" at "Kress excellent Seberg", organized by Management on development of languages, archives and documentation of the akimat of Almaty district of Almaty city.

Every year the College holds the meeting "Tauelsizdik was Yerkin Zholy" with the participants of the December events Sarahyba Bolat Imanly, Yelisova AMS Apsisi, Mukhametgalin SERC Sathani.

3rd year student Arenes Daniyar, who took 3rd place and 1st year student alisova Anastasia, who took 2nd place in city competition of compositions "My favorite teacher" were awarded with diplomas, state University "City scientific and methodical center of new technologies in education" Department of education of Almaty.

Students of the College take an active part in the city and district moral and Patriotic activities.

In honor of "the 550th anniversary of the Kazakh khanate" in the College held a historical and a musical evening and a meeting in the House Almalinskogo students of the district with participation of candidate of historical Sciences, associate Professor EDL by Nanosim.

Through the Department of internal Affairs Almalinsky College students is awarded by the diploma for active participation in the WHC under the auspices of the "Ilysa Jol go!"

The College provides comprehensive assistance in the employment of graduates. For the purpose of employment of graduates, on the basis of GKB on PCV No. 12, the employment center of the Almaty district annually in the spring period, a "job Fair" with the presence of heads of the Department of health and heads of medical institutions. Heads of medical institutions inform the Director of the College about the vacancies of middle managers.

Employment rates of graduates of the OP is 70%, which indicates the demand for College graduates.

During the visit, the experts of the EEC noted the presence of mechanisms for monitoring the satisfaction of students with the activities of the TVE organization in General and individual services, in particular.

The results show the effectiveness and quality of the feedback system, which includes, among other things, the operational presentation of information on the results of knowledge assessment *Questionnaires of students conducted during the visit of VEK NAAR.*

Thus, the Survey showed **94.1%** complete satisfaction of students in relation to the procedures and the results of the assessment of their knowledge and skills.

- Clarity of the evaluation criteria used by the teacher," fully satisfied " **82.4%** of respondents -**98.6% satisfaction**;

- Fully satisfied that" the Teacher objectively assesses the achievements of students " **80.9%** of respondents-**95.6% satisfaction.**

- Objectivity and fairness of teachers" fully satisfied " **95.6% of respondents-100% satisfaction**;

The fairness of exams and certifications "fully satisfied" **94.1% of the respondents -97% satisfaction**;

– **92.6%** of respondents are "fully satisfied" with the tests and examinations-**100% satisfaction.**

Strengths/best practice

- Students are sufficiently informed about the content of the OP, the criteria for assessing their knowledge and skills.
- The College guarantees the quality of programs and allocates resources for the quality of educational services.
- The College provides an opportunity for students to participate in the management of the educational program.
- Student self-government functions;

The recommendations of the WEC:

- Provide the procedure for informing students about changes in the educational program in the management.
- Provide information on the evaluation strategy used to the extent available.

Conclusions of the EEC on the criteria: (strong/ satisfactory/ suggest improvements/ unsatisfactory)

In General, according to this Standard, the activities of the organization meet the criteria.

Quantitative indicators reflecting the compliance of the organization with the standard criteria are as follows::

***Strong positions-3, satisfactory -5,
suggest improvements-0, unsatisfactory-0***

6.6. Standard " Educational resources»

Evidence part

The educational base of the College is represented by 26 classrooms and 1 laboratory. The rooms allocated for the placement of offices and laboratories meet the sanitary and hygienic requirements, the number of students involved in them, accommodate the training equipment and special furniture provided by the tables, allow to observe safety rules during practical and laboratory work. The design of all preclinical practice rooms is as close as possible to the workplace of the future specialist. Equipment of classrooms and laboratories is carried out in accordance with the internal equipment report card authorized by the PED. Council №2 from 24.11.17, developed on the basis of "report cards and the standards resources the offices and laboratories of secondary medical and pharmaceutical education, with the order of the Minister of MHSD RK from 29.05.2015 №423 " Standards of equipment of preclinical simulation rooms of medical colleges "and" Regulations on offices and "Report card and resource standards of offices and laboratories of secondary medical and pharmaceutical education" of the Union of medical colleges of 16.11.2012, library with reading room, gym, medical center, office of computer technologies. According to the development strategy of the College classrooms, laboratories are equipped with the necessary equipment to ensure the quality of education. In each office there is a regulatory set: passport, journal of instructing students on TB, report card and norms of resources of the office and laboratory, the plan of the office, extracts from the SES in the sections "Requirements for the level of training of students", "the Content of the educational and professional program", educational and methodical complexes on the subject, calendar and thematic plans on the subject, work programs, work programs on industrial training and professional practice, existing orders, instructions, samples of medical documentation. Stands containing all the necessary information for students are decorated.

In order to effectively implement educational programs, the College strengthens and modernizes the material and technical resources. The dynamics of the development of material and technical resources is positive. All classrooms and classrooms are equipped in accordance

with the ongoing education program, with the qualification requirements, in accordance with the standards of sanitary and fire safety. The provision of students with computer and information resources is sufficient to conduct a quality educational process, meets the licensing and certification requirements. The given number of computers used in the educational process is 14.4 people per 1 computer. The site operates in Kazakh and Russian languages, offers readers information about the College, answers to questions, career guidance-the main goals of the site.

Analytical part

According to the standard "Educational resources", it can be noted that the availability of organized information for the learning process in all disciplines is ensured for students.

Educational equipment and computer technology meet the requirements of safety during operation.

The implementation of the OP takes into account the individual needs and capabilities of students. Each student is given the opportunity to practice practical skills and learn the training and clinical center, clinical bases.

The College organized free access to educational Internet resources, introduced information technologies, monitors the use and development of teaching staff of innovative learning technologies, including ICT. There is an electronic schedule system, three monitors broadcasts the schedule of groups, both for one day and for the whole semester, indicating the classrooms and teachers of the discipline.

Equipment of offices and laboratories is carried out in accordance with the Schedule and standards of resources of offices and laboratories of secondary medical and pharmaceutical education, with the order of the Minister of the Ministry of health of the SR RK dated 29.05.2015 №423 "Standards for equipping pre-clinical simulation rooms of medical colleges" and "regulations on the office". The simulation center is equipped with modern mannequins, phantoms and models for processing practical skills and abilities in special disciplines.

In total, the College has 96 new generation computers, 15 laptops, 3 TVs, 8 MFPs, 4 multimedia projectors with a screen, 3 interactive whiteboard. All computers of the College are connected to the local network and have access to the Internet through a broadband Internet channel at a speed of up to 10MB/s. also, for wireless access to the Internet, there is a separate Internet channel, with an installed WI-Fi system for wireless access to information Internet resources. For printing and Photocopying of educational documents, the structural units of the College are equipped with copiers: printers, photocopiers, MFP 3 in one (printer/copier / scanner) in the amount of 8 PCs. the College has a website (www.avimed.kz) in two languages (state, Russian), which requires updating and improvement. The site contains information about the work of the College as a whole, and the departments (teaching, training and production and educational work), provides information about the administration, the library, sports life of students, the rules of admission of students. In the "news" section you can learn about the activities, achievements of individual students, teachers and the College as a whole. To date, the site is being improved, its interface with wider functionality and the number of information pages.

The number of educational literature on General subjects is copies, special subjects 37420 copies. The total provision of educational literature for one student of the specialty "pharmacy "with the qualification" Pharmacist " is in the Kazakh language 8230 per student accounts for 14 copies.

Educational literature-11491 copies.

1) in the Kazakh language – 3978 copies.

2) in Russian - 7513 copies.

The Fund of the library of the medical College is annually equipped with new educational, scientific and medical literature. During the reporting period, purchased educational literature in the amount of 23340466 tenge. In 2016-2017, 37420 educational and methodical literature was purchased from them in the state language-845 copies, in Russian 715 copies.

Strengths/best practice

- The training equipment and software used for the development of the OP are sufficient and meet the safety requirements for operation.
- The College has the required number of classrooms equipped with modern technical training facilities that meet sanitary and epidemiological standards and requirements
- The educational institution creates a learning environment that promotes the formation of basic and professional competencies and takes into account the individual needs and capabilities of students
- The College assesses the dynamics of the development of material and technical resources and information support of the OP.
- The College has the required number of classrooms equipped with modern technical training facilities that meet sanitary and epidemiological standards and requirements
- Free access to educational Internet resources.
- The OP guide demonstrated the reflection on the web resource of information characterizing the OP

The recommendations of the WEC

- To improve the material and technical base in accordance with the identified needs and priorities.
- To fill up the book Fund of educational and medical literature on special subjects, including the state language.
- Provide support for distance education for PPP.

(VII) REVIEW STRENGTHS/ GOOD PRACTICES FOR EACH STANDARD

Standard 1. "Mission and leadership»

- Vision, mission and strategy of the College are coordinated among themselves;
- The stated mission and strategic goals correspond to the goals and objectives of the national system of technical and professional, post-secondary education, development of the region;
- All the dynamics of the oppo activities in all areas is carried out in accordance with the mission, strategy, available resources of the College, which ensure the achievement of the final results of training.
- Timely review of the mission, purpose and policies of the College.

Standard 2. «Educational program»

- Compliance of educational and program documentation: model curriculum, model work curricula and programs, individual curricula goals and content of the educational program to achieve the expected learning results;
- Medical College ensures that students acquire sufficient knowledge and professional skills to provide qualified medical services;
- The set goals of the OP and the learning outcomes achieve a qualitative assessment of skills through effective collaboration between health and education organizations.
- The medical College provides various assessment methodologies that reflect established core and professional competencies, and evaluate the achievement of learning outcomes;

Standard 3. "The effectiveness of the educational program»

- The College has a sufficiently equipped material and technical base;
- The opportunity to practice practical skills in the training and clinical center.
- A sufficient number of classrooms in clinical practice bases with modern equipment for training.
- Resources for the acquisition of practical skills and professional competencies of students are presented in full.

Standard 4. "Teachers and teaching efficiency»

- The teaching staff, ensuring the implementation of the OP, is represented by experts in the relevant fields of knowledge covered by the educational program;
- The number and quality of teachers meets the qualification requirements for organizations of the TVET ;
- The teacher takes part in the continuous development of pedagogical skills;
- Effective action " School of young teacher»;
- The College provides evaluation of teachers ' competence and monitoring of their activities
- The distribution of teachers in the disciplines is carried out in accordance with their qualifications for a diploma and / or experience in the workplace, all personnel procedures are transparent;

Standard 5. «Studying»

- Students are sufficiently informed about the content of the OP, the criteria for assessing their knowledge and skills.
- The College guarantees the quality of programs and allocates resources for the quality of educational services.
- The College provides an opportunity for students to participate in the management of the educational program.
- Student self-government functions;

Standard 6 " Educational resources»

- The training equipment and software used for the development of the OP are sufficient and meet the safety requirements for operation.
- The College has the required number of classrooms equipped with modern technical training facilities that meet sanitary and epidemiological standards and requirements
- The educational institution creates a learning environment that promotes the formation of basic and professional competencies and takes into account the individual needs and capabilities of students
- The College assesses the dynamics of the development of material and technical resources and information support of the OP.
- The College has the required number of classrooms equipped with modern technical training facilities that meet sanitary and epidemiological standards and requirements
- Free access to educational Internet resources.
- The OP guide demonstrated the reflection on the web resource of information characterizing the OP

(VIII) REVIEW RECOMMENDATIONS FOR IMPROVING QUALITY

Standard 1. "Mission and leadership»

- To make adjustments to the strategic plan of the College's work on the structural unit in the main areas.

Standard 2. «Educational program»

- Activate the work on the introduction of innovative teaching methods;

- Implement and works to provide an operational link between the educational program and the subsequent stages of professional training of students (bachelor, BSC, specialization) or practice at the end of their training.

- Include in the OP special disciplines modern standards of diagnosis, treatment and emergency care, as well as methods of communication skills (development of SOPs)

Standard 3. "The effectiveness of the educational program»

- Regularly assess and monitor the OP to encourage continuous improvement of the programme.

Standard 4. "Teachers and teaching efficiency»

The recommendations of the WEC:

- To intensify activities to improve the categorization of the teaching staff of the OP;
- To improve the mechanisms of introduction of information technologies and innovative teaching methods;

- To improve the system of information and methodological support of teachers (exchange of experience with other educational organizations);

- To establish cooperation with Kazakhstan and international educational institutions.

Standard 5. «Studying»

- To improve the provision of social and financial support to students;

- It is necessary to establish a system of academic counseling of students on issues related to the choice of elective classes, professional career planning, the appointment of mentors for individual students.

Standard 6. «Educational resources»

- To continue work on equipping classrooms and laboratories in full in accordance with schedules and standards of resources of classrooms and laboratories.

- To continue work on strengthening the material and technical base.

- To continue work on the introduction of electronic textbooks in the educational process.

- Ensure integration with College electronic resources.

- Will ensure the completion of the library Fund of educational manuals in the state language and educational literature of modern publications.

(IX) REVIEW RECOMMENDATIONS FOR THE DEVELOPMENT OF EDUCATIONAL ORGANIZATIONS

- To update the work on the implementation and further certification of the international quality management system.

- To consider the possibility of providing a hostel for non-resident students.

The standard "EDUCATIONAL RESOURCES"					
43	The medical college must ensure that the resources used to organize the learning process are sufficient and meet the requirements of the educational program being implemented.		+		
44	The budget and material resources are in sufficient quantities to ensure that the program achieves its mission, goals and expected results. Verification of the sufficiency of resources is made on a periodic basis and, if necessary, the resources are modified.		+		
45	Academic support services provide quality and are regularly checked for compliance with the educational program and the needs of students. There is a certain procedure for regular verification of the sufficient volume of academic support services provided under the program.		+		
46	Academic support services, available through the educational program, ensure the implementation of the mission and achievement of the expected results of students and at least include the following:				
47	computer and technological services;		+		
48	library services;		+		
49	support of distance education, if necessary;			+	
50	consultancy services, including career counseling in health care;		+		
51	other support services for students (for example, literary centers, support services for persons with disabilities), if they are relevant to the program.		+		
52	The resources are sufficient in volume, level, variety and quantity to support the OP, the research program, and the intellectual and cultural development of students, teachers and staff.		+		
53	The medical college has the necessary resources for acquiring practical skills for students and mastering professional competencies, including specialized laboratories, mannequins,		+		

	simulators, simulation equipment, as well as clinical bases of practical public health.				
54	The College of Medicine must guarantee integration with intramolecular electronic resources, the availability of comparative information (benchmarking) about the achievements of the implementation of the educational program against the background of other specialties (training areas) in the medical college.		+
