On review of the employers graduates educational programs in постдипломный period successfully execute their own professional duties. Many from graduate successfully work at managing job title.

In total qualification, the estimation level to professional preparedness and appropriation квалификации qualification every year participate to employers.

The Exams or protection degree project are conducted within the framework of total qualification. On confirmed graph passes the total qualification. The Results to total qualification are brought in protocols in accordance with order MON RK from 23.10.2007 502 "About approving the form document to strict reporting, used organization in educational activity" (with additions and change, order MON RK from 29.08.2016 531. The Results of the functioning attestation commissions on profession are reflected in report.

Analytical part

Analysis work on standard "Specifics of the educational program" possible note that training skilled specialist in многом depends on qualitative educational programs, which correspond to the квалификационным frame a level formation and requirements of need market labour-make.

Questionnaire training, called on in the course of visit VEK NAAR, has shown, what level accessibility and отзывчивости manual is valued as high -90,9%;accessibility for consultancy on the personal problem is valued -87,3%;the level to complacency scholastic resource college - 89,1%.

The Strong points OP are:

- a participation of the pedagogical group in разработке ОП;
- presence of the efficient balance between theoretical and practical person-oriented discipline;
- an operating the system individual help and consultancies training on questions ОП;
- presence of the system of the monitoring for achievement students.
- an introduction result practical achievements of the teachers by Weak sides OP are:
 - exists systematic work on adjustment ОП in accordance with change market labour-make and requirements of the employer.

In purpose of the further development and improvements to activity of the college on realization accredited educational programs VEK NAARREKOMENDUET:

- continue the functioning on mechanism of accessibility for the public SMI by means of official site of the college to information on professional, larval development and achievements best teacher and student.

VEK notes that specialized profile of the college on given standard contains 15 strong positions, 9 - satisfactory.

6.3. The Standard "Pedagogical group and efficiency of the teaching" " For realization of the educational programs manual OP must attract the practical person and define the share by them discipline " Manual OP must motivate the pedagogical group constantly to use the инновации in educational process " Manual OP must demonstrate the correspondence to of the trained potential of the pedagogical group to specifics of the educational programs " Organization TYPE must demonstrate accessibility for the public of the information about pedagogical group " Manual OP must provide monitoring to activity of the pedagogical group, systematic estimation to competencies teacher, complex estimation quality teaching " Worker load teacher must include the different types to activity.

Manual OP must demonstrate proof of the execution teacher all type of the scheduled load " Manual OP must provide goal-directed actions on development young teacher " Manual OP must demonstrate mechanisms of the stimulation professional and larval development teacher and workman " Manual OP must provide monitoring to complacency of the pedagogical group " Manual OP must demonstrate IT-компетентность pedagogical group, using инновационных methods and forms of the education " Important factor is a participation of the pedagogical group in life society

Prove part

The Trained policy in college is realized in accordance with the main priority of the Strategies of the development of the college and correspond to the modern trend in the field of work with human resource. Selecting the personnel is produced on installed by order of the Minister of the formation and sciences of the Republic Kazakhstan from July 13 2009 338 requirements by method of the conversation and studies summary.

Acceptance on functioning is realized by conclusions of the labor agreement in writing in duplicate, each of which signs the director and workman. In трудовом agreement are specified term, provided by Labor code RK: mode and length of the uptime, volume of the load, compensations, right and duties of the parties. Need of the college in staff is defined by gross amount hours scholastic load Annually payment of the load is clearly defined in college on category miscellaneous of the teachers, coming from which is defined crew scheduling.

In performance of the Law of the Republic Kazakhstan "About formation" and order i.o. The Minister of the formation and sciences RK from January 8, 2016 9 "About approving the Rules of the pedagogical ethics" Rules of the pedagogical ethics were approved in college, which follow the pedagogical work mans and follow the requirements of the professional honour.

Observance of the rates of the professional honour in relations on all his(its) level, falls into sphere of the individual liability of each teacher. The Rates and rules of the professional honour in college, find the reflection right in collective agreement, Rule of the internal routine, duty regulations of the teacher, who spread on the whole teaching composition and with which all are acquainted.

The Educational programs realize the teachers of the different age groups: experienced, with big pedagogical and professional length of service and young teachers, who show the longing to modern technology. Particularly important role ПС in formation scholastic-methodical complex, which define the educational program.

Need on accredited by ОП in professional-квалификационном level of the pedagogical group is defined by direction of preparation training, license requirements. For realization accredited by ОП are attracted person, having vocational training corresponding to profile, level to qualifications which corresponds to specifics accredited by ОП. As a whole, possible establish that ОП are completely equipped by skilled teaching composition (according to crew scheduling) for the whole period of the education. For increasing quality teaching, the provision close-fitting intercoupling with production to scholastic process are attracted specialists, possessing experience of the functioning in corresponding to branch.

The Volume of the different functioning, planned each teacher, is fixed depending on his(its) qualifications and with provision for his(its) individual possibilities. The Volume of the scholastic load pedagogical workman is fixed coming from amount hours on curriculum, scholastic program, supplies by personnel(frames) and other concrete terms. The Rules of the pedagogical ethics and Code to academic probity, which follow the pedagogical workman and follow the requirements of the professional honour.

The Composition engineering-pedagogical workman of the educational program 0508000 "Organization of the feeding", 0518000 "Account and аудит" forms 23 persons, of them 3 teachers of special discipline.

The Share of the staff teachers forms 100 % from the gross amount of the pedagogical composition ОП. On length of the row of the years high factor level of the formation pedagogical workman it remains in college.

The Share workman with higher educations forms 91%, amongst them 4% - a teachers having degree "Master" Average age of the pedagogical group forms 37лет. The Share pedagogical workman at age: senior 60 years - 9 %, from 45-60 years - 13%, from 30-45 years - 69 %, before 30 years - 9 %.The Main part engineering-pedagogical workman (52 %) have a pedagogical length of service of the functioning over 16 years, from 6-10 years - 13 %, from 11-15 years - 22% ,before 5 years - on 13%.

The Worker load teacher includes the different types to activity. Manual OP will demonstrate proof of the execution teacher all type of the scheduled load, provides the goal-directed actions on development young teacher. The College provides monitoring to complacency of the pedagogical group.

For the reason professional and social adapting the young teachers is organized education in "School of the young teacher".

The Purpose of the functioning SHMP - a methodical accompaniment to activity beginning teacher, opening the individual pedagogical abilities, shaping need for constant itself-development and improvement-itself, rendering practical help teacher in questions of the improvement of the theoretical knowledges and increasing pedagogical skill.

For increasing quality teaching, the provision close-fitting intercoupling with production to scholastic process are attracted teachers-practical persons, possessing experience of the functioning in corresponding to branch.

On professions 0508000 "Organization of the feeding" are attracted teacher-practical person Aytahulova D.B. on discipline "Technology and organization of the feeding".

About high level skill and creative activity of the pedagogical group witness the presentation a workman to reward departmental sign of the difference and state award. The Rank "Best pedagog-2016" from akim Aktobe area received Muldasheva B.K. (2016).

There is интерактивные of the board In all cabinet in kit with computer, multiplying technology.

There is on professions 0518000 "Account and аудит" at study of special discipline in cabinet is used graphically - an information equipping stand. For organization scholastic-воспитательного of the process, the research work on professions 0518000 "Account and аудит" for preparing specialist average звена IPR use: cabinets of special discipline, where is installed интерактивные of the board; the scholastic computer classes for learning with use ИКТ, equipped computer, connected to Internet; the scholastic cabinets общепрофессионального and special cycle (the cabinet of the informatics and computing machinery, accounting, financial account, finance and credit, cabinet mathematicians, statistics and аудита.

All are a computer classes and laboratory have a passport, permits санэпидстанции and fire-prevention service on their function In each cabinet and laboratory there are in presence necessary set methodical developments, descriptions of the individual tasks, reference literature, stands, posters. For undertaking laboratory and practical work there is in presence necessary set methodical developments, descriptions of the individual tasks, reference literature.

In library, the reading common-room and local-area network of the college in computer class of the college each training has an access to necessary scholastic-methodical material.

The Library fund is constantly renewed new scholastic allowance publishers

" Foliant" Astana2017 year"Kontroli quality to product and services of the public power supply", "Tamaktanu zhane the sanitation negizderi", "Тамактандыру management", and others book-suply accredited educational programs is presented in table:

The Cipher and short name to professions	General fund exam	Including on state language
0518000 Accounts and аудит, 0518033 Economists-accountant	1847	564
language 0518000 Accounts and аудит, 0518033 Economists-accountant	1821	896

For undertaking occupation on physical culture and shaping sound lifestyle beside training are equipped with and equipped by athletic stock athletic common-room and simulator common-room. Platform is actively used at year term for year sports.

Analytical part

As a whole material and technical, information and library facility, used for organization of the process of the education and education, are sufficient for performing declared to missions, integer and tasks and be up to quality realized OP.

Questionnaire PS, called on in the course of visit VEK NAAR, has shown that: teachers value "well" or "much well" presence necessary scientific and scholastic literature in library for teachers - 100%

Questionnaire training, called on in the course of visit VEK NAAR, has shown that students completely satisfied: level to accessibility library resource 87.3%, quality of the rendered services in library and reading common-room 94.5%, complacency existing scholastic resource of the college 89.1%, accessibility of the computer classes and internet resource 81.8%, usefulness веб-site organization formation as a whole 87.3%, room of the rest for student 81.8%.

Analyses work on standard "Facility, used at realization of the educational programs" possible note the positive speaker of the growing оснащенности material and technical base of the college, including for count of attraction спонсорский help.

VEK notes that in educational institution on given standard emphases is spared such position as:

- in organizations TYPE is created ambience of the education, assisting shaping base and professional competency and taking into account individual need, and possibility training;
- in organizations TYPE is created ambience of the education OP, in which enters the necessities an amount computer classes, reading common-room, multimedia and lingual-training cabinet, number of the landing places in them;
- in organizations TYPE is created ambience of the education OP, in which enters the free access to educational internet-resource;

In purpose of the further development and improvements to activity of the college on realization accredited educational programs VEK NAAR recommends:

- demonstrate the reflection on official put the college to information, characterizing OP.
- provide the courses on study of English teacher special discipline.
- continue work on equipping scholastic-methodical complex, for undertaking occupation on production education
- provide the training access to персонифицированным educational resource, rendering aid in choice of the achievements карьерных ways VEK notes that specialized profile of the college on given standard contains 5 strong positions, 9- satisfactory, 1 positions requiring improvements.

6.6. Standard "Standards in cut of the separate professions"

Prove part

The Contents of preparation specialist miscellaneous level is connected with the following factor, such, as length (the period) of the education, correlation theoretical and practical preparation, correlation of the volume and contentses professional and special preparation. In this connection, one of the primary tasks, costing before modern formation this education and education to diversified personality training on a par with his(its) professional formation.

The Contents of all discipline of the educational program is based and has a clear intercoupling with contents fundamental general and natural sciences. Fundamental naturally - scientific preparation student is called promote shaping of one of the key groups competency - exploratory and самообразовательных.

The Modern stage of the use information technology is characterized by transition from decision of the tasks production and control to decision of the social tasks.

OP important factor is an use modern pedagogical technology, which promotes shaping creative stiletto to activity of the future specialist, and greatly raise the motivation, depth and fullness of the mastering profession. Big attention when preparing specialist professions:

0508000 "Organization pitaniya",0518000 "Account and аудит" is spared functioning, directed on aquisition and improvement practical skill.

The Combination of the theoretical education and practical persons is reached by use on occupation practical person-oriented technology, competence-oriented tasks.

OP are regularly discussed questions to organizations practical person, increasing to qualifications of the teachers, are considered problems of the improvement of the methods of the teaching, use инновационных technology, condition of the methodical ensuring the scholastic process.

Use information-computing machinery at observance of the row of the certain conditions promotes increasing a quality educational process and shaping to readiness to professional activity, shaping skill information modeling, need of the unceasing formation.

Emphases in college is spared technology, the forms and method to organizations of the scholastic process. The Study, introduction modern methods of teaching, decision of the problems, find the reflection in called on seminar, master-class. Undertaking the week special discipline profession data promotes the activations cognitive and practical activity training on lesson and внеурочное time, increasing them quality got on occupation of the knowledges and skills, extension of the pollytechnic outlook, broad development of the creative abilities training.

Training, got theoretical knowledges OP bolt the practical skill on production practical person, in time passing of the education on enterprise.

Three-sided agreements "are comprised For undertaking professional practical person About social partnership" with enterprise and organization of the region, city and area, determined as bases practical person. In agreements, concluded by college with enterprise and organization, being base practical persons, is guaranteed ensuring the passing all type professional (production) practical persons, term of the safe labour-make on worker place, the forms of the realization of the supervision for safe conduct of the functioning, are specified duties and liability of the parties.

At conclusion of the individual agreements with enterprise residing outside the city are called solicitation about direction and statement from legal representatives.

Visited bases practical person accredited programs:

Donskoy is blazed-enrich combine, dinning-room of the mine "Youth", dinning-room of the factory of the enrichment and bumpy ore, dinning-room crush-enrich of the factory 1. The Introductory briefing on TB is organized leading engineer on TB Sultanovoy R.B. Meeting took place When visit the mine "Youth " with director Suyuntaevym A.T.

When visit the table factory of the enrichment and окомковывания руды эксперты got acquainted with material and technical base of the object, have visited table TOO "Ali-ZHas and worker of the place were examined To", where students 2 courses of the group 205 Aymagambet Danmark, ZHumabaeva Ulbolsyn, Azimova Aruzhan pass the technological practical person since 02.04.2018 -24.06.2018 year.

The Members VEK were met with mentor Kiselevoy Lyudmiloy Vitalievnoy, have in the same way visited the table mine "Youth", where students 2 courses of the group 205 - ZHumabaeva VWVgape, Erzhan ZHuldyz, Kangerey Lyaziza pass the technological practical person, which mentor is зав by production Alimambetova ZHanylay ZHolbatyrovna. The Students in accompaniment mentor executed the different types of the functioning (the preparation cool and hot guard;keep). The Leader given professional technological practical persons is a teacher Satmuhanbetova A.B. There are 3x outside agreements on undertaking professional practical persons, from 27.08.2017.

The Members VEK have visited the scholastic occupations on accredited educational program. The Visitted occupation of the group 105, 1 course, on discipline "Russian literature" on subject: "In amazing world of the russian literature 20-21века". Given occupation conducted the teacher to second category Talasbaeva G.T, 20 students were present on lesson from 25 persons. The Teacher used collective and individual form of the education, presentation with slide, cards with task, distributing and demonstrative material, corresponding to tasks in program ambience. The Students actively took part. The Teacher was used non-standard type of the occupation "Lesson-play". The Analysis of the visit occupation is indicative of get prettier, qualitative teaching composition, sufficient theoretical and practical level of the education. Modern active

technologies of the education use On occupation of the teachers. Use modern pedagogical technology promotes shaping creative stiletto to activity of the future specialist, and greatly raise the motivation, depth and fullness of the mastering profession.

Analytical part

The Analysis to activity of the pedagogical composition of the college is indicative of longing of the group to improvement of the qualitative development of the college.

Analyses work on standard "Standards in cut of the separate professions" possible note that for the reason familiarizations training with professional ambience and actual questions in the field of specialization, as well as for aquisition skill on base of theoretical preparation program formation includes the row an action, in the manner of optional and кружковых of the functioning- факультатив "Vkusnoteevo", club "VWV get to know itself", Facultative "Buhuchet" and other directed on reception of the practical experience and skill on professions.

The Result of the education on accredited educational program are: shaping beside training competency, claimed on the market of the labour-make, shaping to readiness to professional activity, larval, professional and social development training, promoting socializations, shaping the general culture to personalities.

VEK notes that in educational institution on given standard emphases is spared such position as:

- crowding relationship training with professional ambience, which comprises of itself:
- an introducing the programs module- competence of the approach;

Recommendations VEK

- recommend to organize the seminars practical works, master-classes with use the most latest technology, technological equipment with attraction of the employers, working on innovation technology.

- recommend at determination of discipline at the option to organizations of the formation, take into account the offers of the users and provide discipline "Restaurant business" on professions "0508000-Organizations of the power supply".

Together with that, VEK calls attention that for efficient functioning in educational institutions follows to call attention:

- recommend to system undertaking separate occupation, undertaking master-classes on enterprise PRIST.

Findings VEK on критериям:

VEK notes that specialized profile of the college on given standard contains:

2 - a strong position, 2- satisfactory and 0 expects the improvement.

(VIII) REVIEW STRONG POINT/ BEST PRACTICAL PERSONS ON EACH STANDARD (1 p.)

6.1. Standard "Control educational program"

- an organization TYPE demonstrates the development of the plan of the development OP, his(its) directivity on satisfaction of requirements state, interested persons and training;
- an organization TYPE provides adequacy of the plan of the development OP available resource, need market labour-make and educational politician RK;
- an organization TYPE defines the mechanisms of the shaping and regular revising of the plan of the development OP and monitoring to his(its) realization;
- a plan of the development OP passes public discussion with representative all concerned party, on base of the offers and adjustments which representative collective organ to organizations TYPE contributes the changes to project;
- control OP includes the mechanisms of the planning, developments and constant improvement;

6.2. The Standard "Specifics of the educational program" -a participation of the pedagogical group in development OP;

- presence of the efficient balance between theoretical and practical person-oriented discipline;

- an operating the system individual help and consultancies training on questions OP;

- presence of the system of the monitoring for awarded students.

- an introduction result practical achievements of the teachers

6.3. Standard "Pedagogical group and efficiency of the teaching

- manual of the college directs on periods of trial of the teachers special-discipline and their increasing to qualifications including and overseas;

- manual OP provides monitoring to activity of the pedagogical group, systematic estimation to competencies teacher, complex estimation quality teaching;

- a pedagogical group actively participates in lifes society.

6.4. Standard "Training"

- a majority promising exhaust course get the offers about functioning during practical persons already.

- a students of the college are trained on order enterprise directly.

6.5. Standard "Facility, used at realization of the educational programs"

- in organizations TYPE is created ambience of the education, assisting shaping base and professional competency and taking into account individual need, and possibility training;

- in organizations TYPE is created ambience of the education OP, in which enters the necessities an amount computer classes, reading common-room, multimedia and lingual-training cabinet, number of the landing places in them;

- in organizations TYPE is created ambience of the education OP, in which enters the free access to educational internet-resource;

6.6. The Standard "Standards in cut of the separate professions"

- crowding relationship training with professional ambience, which comprises of itself:

- an introducing the programs module- competence of the approach.

(VIII) REVIEW to RECOMMENDATIONS ON IMPROVEMENT QUALITY (1-2 p.)

6.1. The Standard "Control educational program" -develop and introduce the procedure of the internal system of management quality (monitoring and estimations quality to activity collective organ structured subdivisions, employee, teacher, administrative-management personnel

of the college) -place in интернете, on put governing the formation video-lessons and video-lection, master-classes from the best teachers, for the reason spreading the leading experience.

6.2. Standard "Specifics of the educational program"

- continue the functioning on mechanism of accessibility for the public SMI by means of official site of the college to information on professional, larval development and achievements best teacher and student.

6.3. The Standard "Pedagogical group and efficiency of the teaching -an administrations to provide the transparency when taking the trained decisions;

- raise level a study foreign languages teacher college in connection with phased transition on трехязычное formation

6.4. Standard "Training"

- intensify the role a students in activity of the Pedagogical advice.
- create the system of the monitoring of need market labour-make, for making the new professions;

- provide manual OP possibility training for changing and expressions of the opinions;

6.5. Standard "Facility, used at realization of the educational programs"

- demonstrate the reflection on official put the college to information, characterizing OP.
- provide the courses on study of English teacher special discipline, in connection with phased transition on трехязычное formation.

-continue work on equipping scholastic-methodical complex, for undertaking occupation on production education -provide training access to персонифицированным educational resource

6.6. Standard "Standards in cut of the separate professions"

- organize the seminars practical works, master-classes with use the most latest technology, technological equipment with attraction of the employers, working on инновационным technology.

- recommend at determination of discipline at the option to organizations of the formation, take into account the offers of the users and provide discipline "Restouran - business" on professions "0508000-Organizations of the feeding".

- recommend to system undertaking separate occupation, undertaking master-classes on enterprise PRIST.
