Mazhit Shaidarov
Rector
JSC “Astana Medical University”

Dear Prof. Shaidarov Mazhit Zeynullovich!

Independent Agency for Accreditation and Rating (IAAR) is pleased to inform you that, at its meeting of 29 May 2017, the IAAR Accreditation Council agreed that educational program of basic medical education 5B130100 - «General Medicine» met the necessary requirements for being granted the accreditation for five years from that date and educational program 5B130200 - «Dentistry» of Astana Medical University also met the necessary requirements for being granted the accreditation for five years from that date.

Post-accreditation monitoring of the educational programs of basic medical education 5B130100 - «General Medicine» and 5B130200 - «Dentistry» of Astana Medical University is planned for 2019.

Annex:

- Recommendations for further improvement of the educational program 5B130100 – «General Medicine» on 1 sheet;
- Recommendations for further improvement of the educational program 5B130100 – «Dentistry» on 1 sheet;

Your sincerely,

Alina Zhumagulova
Director

Recommendations for further improvement of the educational program 5B130100 – «General Medicine»:

- to reflect in the mission statement of the University the achievements of medical research in the field of biomedical, clinical, behavioral and social sciences, aspects of global health, international health problems with broad involvement in the discussion and approval of the mission and objectives of the academic program of representatives of practical health care;

- to envisage studying and documenting the validity of methods for assessing the learning achievements of students and reviewing existing methods for assessing students' knowledge and skills in accordance with the accepted competence-oriented model of medical education and the possibility of adequate evaluation of active / interactive teaching methods used in the HEI;

- to envisage the possibility to reduce the group's size to 6-7 students in one group, revise the calendar-thematic plans for classes, the learning kits (working curriculum, syllabus) to increase the time for students to study at the patient's bed and develop practical skills;

- to initiate the process of searching for the possibility to expand and acquire additional accommodation for students to live in by negotiating with the Mayor's house of Astana city (for instance, renting residential complexes built under EXPO-2017, developing state and business partnership, etc.);

- further improvement the process of increasing the staff potential by advancing a career development program for the teaching staff with the definition of the need for scientific and pedagogical personnel, increasing the request for training of specialists for the master and doctoral studies in the framework of the state order, and on a contractual basis; active search for qualified specialists;

- to initiate the process of acquiring own university clinic.

**Recommendations for further improvement of the educational program
5B130100 – «Dentistry»:**

- to raise the awareness of students about the Model by including information in the syllabus of disciplines, when acquainted with the policy of organizing the educational process at the departments;

- to initiate the process of acquiring own university dental clinic;

- to develop a system for the formation of the teaching staff with academic degrees through targeted training in magistracy and doctoral studies;

- to adapt the system of the current evaluation of students' learning achievements to the competence model of education, taking into account the modern educational technologies used in the university;

- to review the occupancy of the training groups at the senior courses in the direction of reducing the number of students, taking into account the specifics of dental education.
